

Lift Farrowing Crate

Deba Brothers® is a professional China Lift Farrowing Crate manufacturers and suppliers. Lift farrowing crate can reduce the mortality of piglets effectively and provide a basic guarantee for PSY. When the sow stands up, the back of the sow touches the sensor and raises the sow's position through the pressure system. In the process, the piglet will leave the sow lift. When the sow lies down, the stall sensor is turned off, and after the sow's position slowly drops to a uniform level, the piglets can continue to eat. The elevator farrowing crate can reduce the chance of the piglets being crushed.

Product Description

Deba Brothers® is a leading China Lift Farrowing Crate manufacturers, suppliers and exporter. The lift farrowing crate is a kind of farrowing crate specially produced by Deba Brothers® to protect piglets. Lift farrowing crate can reduce the mortality of piglets from 5% reduce to lower than 1%, prevent the sow from rolling on and crushing her piglets, especially the first week after the piglet born, and provide good performance PSY. When the sow stand up, the sow back touches the sensor and raises the sow's standard floor through the compress air system, the piglet will leave the sow's floor then. When the sow lies down in the lift farrowing crate, the sensor don't touch sow's back and lift floor drops slowly to ground floor level, the sow can continue lactation the piglets.

Lift Farrowing Crate Specifications

Total size	2400*1800mm
Stretch trough	500*420*290mm,SST 304,1.5mm thickness
Sow floor	25'*42'America cast iron floor/tri-bar floor
Piglet floor	400*600 plastic floor lift
Support beam	2400*120mm galvanized steel beam&FRP beam

Insulation system	Triangle plastic insulation box&175W insulation lamp
-------------------	--

Lift Farrowing Crate Accessories

Stainless steel rolling feeder	wholly turn round
Sensor	Measure feed volume left in feeder
Stainless steel lifting platform	Separate sow and piglet; prevent the piglet to be crushed
Fully plastic coated steel floor	non-slip and does not hurt the hoof
304 stainless steel+plastic lifting move device	antirust and easy to clean
Removable hot dip galvanized rear door	adjustable space
Wholly hot dip galvanized steel stall	20 years anti-rust

Lift Farrowing Crate Advantage

- 1.The crushed piglet rate is reduced by 90%, and the adjustable farrowing pen equipment cost is recovered in one year.
- 2.Directly reduce 1-2 piglets to be crushed to death per litter.
- 3.Comprehensively improve PSY, each lactation period can be reduced. There is no need for personnel to supervise the production process by using balance farrowing pen.

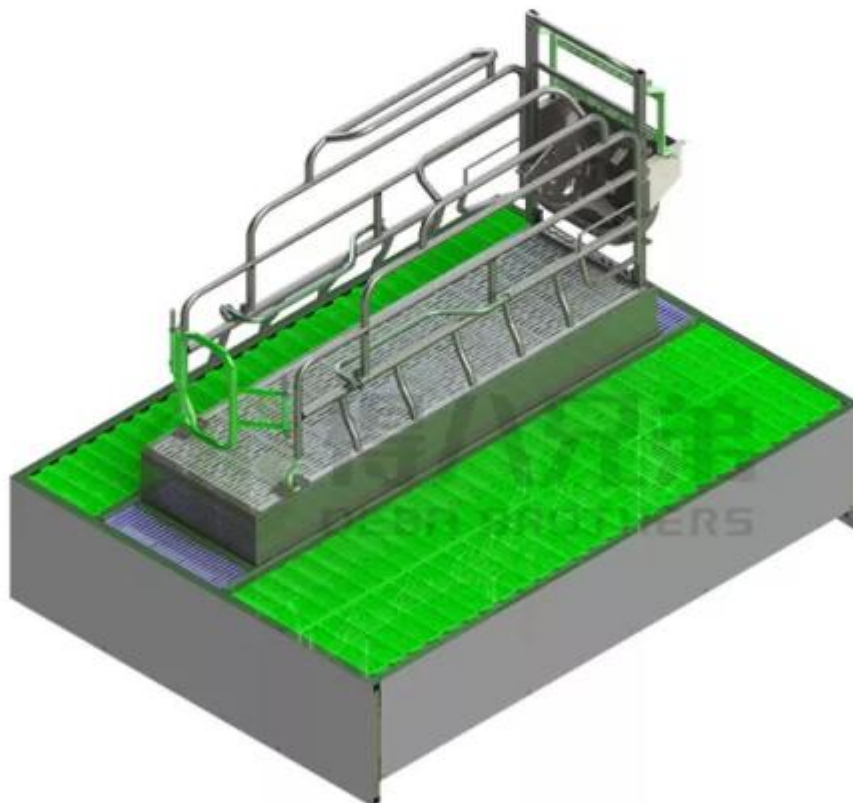

Lift Farrowing Crate details

- 1.The height of elevated platform is 25cm, and there is an prevent pinching strip.
- 2.Sensor,touch sow back to control lift up and down.
- 3.Stainless steel stretch feeder, rolling turn round.
- 4.Free choice of plastic-coated floor and plastic floor to control costs.
